

April 10, 2018

Honorable Chairman Jeb Bradley
Senate Health and Human Services Committee
Room 101 Legislative Office Building
33 N. State Street
Concord, NH 03301

Dear Chairman Bradley and Members of the Committee,

Thank you for the opportunity to testify today. My name is Kenneth Norton and I serve as Executive Director of NAMI NH, the National Alliance on Mental Illness. I also have a family member with a serious mental illness and co-occurring substance use disorder. On behalf of NAMI NH, I am here to speak in support of HB 587. I am also here today to speak as a Licensed Independent Clinical Social Worker (LICSW) in the state of NH and as member of the National Association of Social Workers (NASW). NASW has opposed conversion therapy since 1992 as having no basis in science and being in direct conflict with the NASW Code of Ethics.

One of the maxims that all health professionals should aspire to is to *do no harm*. The potential for harm caused by conversion therapy rises beyond shame and trauma; which can have lifelong impacts, and has the potential to be life threatening. As the chart below indicates, suicide is the second leading cause of death for ages 10-24 in NH (as well as nationally). According to the US Center for Disease Control, LGBT youth represent a significant high risk sub-group as evidenced by their rate of suicide attempts which is 4 times greater for LGB youth and 2 times greater for questioning youth, than that of straight youth. Additionally, suicide attempts by LGB youth and questioning youth are 4 to 6 times more likely to result in injury, poisoning, or overdose that requires treatment from a doctor or nurse, compared to their straight peers. Data has been much more difficult to obtain specific to transgender youth, but all current evidence points to their being at much higher risk.

NH Top Ten Leading Causes of Death 2011-2015

Rank	Age Groups										All Ages
	<1	1-4	5-9	10-14	15-24	25-34	35-44	45-54	55-64	65+	
1	Congenital Anomalies 44	Unintentional Injury 10	Malignant Neoplasms ---	Malignant Neoplasms 11	Unintentional Injury 252	Unintentional Injury 459	Unintentional Injury 381	Malignant Neoplasms 893	Malignant Neoplasms 2,572	Heart Disease 10,179	Malignant Neoplasms 13,458
2	Short Gestation 41	Congenital Anomalies ---	Unintentional Injury ---	Suicide 109	Suicide 109	Suicide 143	Malignant Neoplasms 207	Heart Disease 570	Heart Disease 1,195	Malignant Neoplasms 9,501	Heart Disease 12,128
3	Maternal Pregnancy Comp. 29	Heart Disease ---	Homicide ---	Unintentional Injury ---	Malignant Neoplasms 20	Malignant Neoplasms 78	Suicide 165	Unintentional Injury 453	Unintentional Injury 355	Chronic Low Respiratory Disease 2,935	Chronic Low Respiratory Disease 3,377
4	Placenta Cord Membranes 17	Homicide ---	Cerebro-vascular ---	Benign Neoplasms ---	Heart Disease 14	Heart Disease 98	Heart Disease 119	Suicide 281	Chronic Low Respiratory Disease 329	Cerebro-vascular 2,082	Unintentional Injury 3,276

However, more closely related to this bill, and the potential for harm of conversion therapy, is that LGB youth who come from highly rejecting families are 8.4 times as likely to have attempted suicide as LGB peers who reported no or low levels of family rejection.

In addition, the Journal of the American Medical Association (JAMA) released a study in 2017 showing decreased suicide rates both for GLB teens and for the teen population overall in states that have passed gay marriage.

The practice of conversion therapy in any form is a danger to the mental health and well-being of youth and young adults. Please vote HB 587 as ought to pass. Thank you for your consideration.

Respectfully,
