March 16, 2021

Honorable Kenneth Weyler Chairman
House Finance Committee
Room 210 Legislative Office Building
State Street
Concord, NH 03301

Chairman Weyler and Members of the Committee:

My name is Kenneth Norton, and I am the Executive Director of NAMI NH, the New Hampshire Chapter of the National Alliance on Mental Illness. NAMI NH is a grassroots non-profit organization whose mission is to improve the lives of all people impacted by mental illness and/or suicide. I am a Licensed Independent Social Worker (LICSW), have served as a subject matter expert on suicide and mental illness to SAMHSA and the Department of Defense, I am a former foster parent, and I have family members with mental illness as well as addictive disorders.

During Governor Sununu’s budget address on February 11, 2021, he once again stated NH is in a mental health crisis. This crisis has been exacerbated by the pandemic. Local and national data indicate during the past year there have been significant increases in stress, anxiety and depression across all ages, though particularly impacting children, and youth. The most visible symptom of this is emergency department boarding of individuals in a mental health crisis while waiting for an inpatient bed. This is a practice NAMI NH has long described as wrong medically, legally, ethically, morally, and economically.

During the past month we have exceeded previous highs of the numbers of people being boarded with 51 children being boarded on February 14, 2021, and a combined high of eighty-nine children and adults being boarded on February 17, 2021.

The chart at left gives a longitudinal look at emergency department boarding from April of 2015 through February of 2021. Children are in dark blue, and adults are in black. You will note the spike for both adults and children during the past year coinciding with the pandemic.

Emergency Department Boarding is the tip of the proverbial iceberg relative to timely access to mental health care. There are long waits for outpatient treatment if people can get appointments at all.

Find Help, Find Hope.

Workforce shortages pose an ongoing challenge to addressing NH’s mental health crisis. Fully funding the State Loan Repayment Program (SLRP) is critical to addressing workforce shortages in mental health and other health related fields.

Suicide continues to be a significant public health issue in our state. Suicide is the second leading cause of death (after accidental injury) in New Hampshire for those for ages 10-34 and age third leading cause of death ages 35-44 and fourth leading cause of death ages 45-54. A 2018 report by the US Center for Disease Control issued report in June 2018 indicated NH had the 3rd highest increase in suicide rates in the US. Suicide has a profound impact on the family and friends left behind and can also have a devastating impact on schools, communities, and workplaces.

We anticipate the mental health impact of the pandemic will continue for some time to come. For children and youth, the impact of delayed or missing key social or academic developmental milestones will likely have lasting impact academically, socially, emotionally, and ultimately may negatively impact their mental well-being. For parents, the yearlong mental health impact of juggling virtual learning of children with work and other responsibilities is taking a visible toll. We are also beginning to see negative impacts of the year-long pandemic on our workforce, many of whom have been under tremendous pressure. This impact goes well beyond the obvious front line health care providers, first responders, teachers and others and is impacting across many different businesses and organizations.

This includes our Department of Health and Human Services. Across all departments people have worked extraordinarily hard to meet the needs of NH’s most vulnerable residents during the pandemic. Specifically, the Division of Behavioral Health needs to be fully staffed in order to have the leadership and capacity to move the 10-Year Mental Health Plan forward and to hold the various systems accountable to achieving the objectives of the plan.

Toward that end, we must continue the work begun during the 2019 legislative session of implementing the key recommendations of the 2019 10-Year Mental Health Plan. This includes continuing to focus on developing a continuum of community-based services for mental health crisis response, step up and step-down services, inpatient and outpatient capacity, supported housing, peer support, suicide
prevention and substance use disorder services. This also includes moving ahead with building a new forensic hospital in order to end the practice of people with mental health conditions who have not been charged with crimes being transferred to the Department of Corrections and the Secure Psychiatric Until. It is imperative that we continue to prioritize mental health funding in order to address the mental health crisis we are currently facing. I call on you to fully fund mental health services as proposed in the Governor’s budget.

Lastly, as a member of the Governor’s Law Enforcement Accountability, Community and Transparency Commission, I offer my strong support for fully funding Police Standards and Training as included in the Governor’s Budget. As a member of the committee, it was clear that Police Standards and Training required significant increased funding in order to meet the recommendations of the previous Legislative Budget Audit. Additionally, there were specific recommendations that were made by the LEACT Commission included in the Governor’s budget. With over 45% of the officer involved shootings in New Hampshire being people with known mental illness, NAMI NH strongly supports increased funding and support for Police Standards and Training as proposed in the Governor’s Budget.

Thank you to all the Finance Committee Members for your hard work and service to our state. If I can be of any assistance as you address mental health issues during your budget deliberations, please feel free to contact me.

Respectfully,

Kenneth Norton, LICSW
Executive Director
